

Cheese Block Cutters

Cheese Block Cutters

Technical perfection over instinct

Cheese Block Cutters

The perfect starting point for downstream processing: large blocks of cheese are divided fully automatically lengthwise or across, horizontally or vertically into equally sliced loaves and bars. The blocks are scanned and weighed prior to cutting and are therefore precisely aligned and cut in a fully automatic process.

Technical Versions	Line Parameters
store buffering of cheese blocks	25 cheese loaf/min
- aligning blocks - scanning products -	
weighing and intelligently cutting the cheese into blocks and bars of equal weight	
Cutting cheese lengthwise or crosswise with a guillotine and/or cutting it with a circular-blade cutter	cheese block dimensions: 300 x 500 x 100 mm 711 x 711 x 599 mm 800 x 600 x 200mm 280 x 360 x 180mm 711 x 711 x 180mm 800 x 800 x 170mm
